CENSUS

UNITED STATES FOREIGN TRADE

SUMMARY REPORT
FT 950-I

JUNE 1960

FOR RELEASE
August 12, 1960

IMPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the increase in United States general imports from $1,259.5 million in May to $1,313.0 million in June reflected higher levels of imports from all areas except Western Europe. Changes in the dollar value of imports from all areas from May to June are as follows: Latin American Republics, from $308.5 to $332.4 million; Canada, from $254.3 to $271.6 million; dependencies of Western Europe, from $79.3 to $80.6 million; Western Europe, from $363.3 to $347.2 million; and "all other countries," from $254.0 to $281.2 million.

The Bureau also pointed out that imports from O.E.E.C. countries fell from $354.6 million in May to $341.0 million in June while, during the same period, those from sterling area countries rose from $213.2 to $228.2 million. Increases were reported in imports from all the continents except Europe, North America, and Africa.

Imports from South America increased noticeably from $186.2 million in May to $232.9 million in June as increases were reported in imports from Venezuela, from $72.5 to $90.3 million; Brazil, from $47.7 to $62.0 million; Peru, from $10.0 to $20.2 million; and Chile, from $13.8 to $18.5 million. The increase in imports from Asia from $222.3 to $244.3 million largely reflected higher levels of imports from Japan, from $96.0 to $103.6 million; Republic of the Philippines, from $23.8 to $29.4 million; Republic of Indonesia, from $17.5 to $22.9 million; and Kuwait, from $9.2 to $13.0 million. Imports from Australia and Oceania rose from $21.0 to $29.5 million owing chiefly to an increase in imports from New Zealand from $12.8 to $20.0 million.

During the period, imports from Europe fell from $367.9 to $356.1 million as decreases occurred in imports from individual countries of this continent as follows: Turkey, from $12.7 to $3.3 million; France, from $35.1 to $29.4 million; and the Netherlands, from $19.1 to $15.5 million. Imports from North America declined from $410.6 to $402.8 million reflecting, in part, decreases in imports from Cuba, from $60.3 to $47.7 million; and Mexico, from $40.1 to $28.2 million which were largely offset by an increase in imports from Canada, from $254.3 to $271.6 million. Imports from Africa decreased slightly from $51.4 to $47.4 million.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics.

COUNTRY DEFINITION: Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may in an number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consilidated. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude United States import duties. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: Formal entry shipments valued less than $100 and informal entry shipments valued $250 or less (less than one percent of total import value) are estimated by sampling. The estimated values are included in the area, continent, and country totals in the table. The variability in the import figures due to sampling is no more than three percent or less than $50,000. For further information regarding the sampling procedures, see the "Explanation of the Sampling Procedure for Estimating Low Valued Imports" in the foreword of Report No. FT 110. The largest variation from rounding of figures is $50,000.

Further information regarding coverage, country definition, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 110. For complete statement, see the foreword in Foreign Commerce and Navigation of the United States.

USCOMM-DC

UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: JUNE 1960 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into bonded warehouses. Figures for 1960 are as originally issued and have not been revised to include published corrections. Figures for 1959 include revisions published with the December 1959 reports, or earlier, but do not include revisions published during 1960. See "Explanation of Statistics" for information on sampling procedures and effect thereof on the data shown.)
